PROFESSIONAL SUMMARY

Motivated and creative Computer Science student passionate about Software Development, AI, and UI/UX Design. Known for a quick-learning attitude, strong problem-solving abilities, and building practical solutions that enhance user experiences.

EDUCATION

R.V.R. & J.C. College of Engineering, Guntur.

Bachelor of Technology - Computer Science and Engineering (Data Science)

June 2027

CGPA: 8.47/ 10

Sri Chaitanya Educational Institutions, Guntur.

Higher Secondary School, Stream: M.P.C

March 2023

CGPA: 9.74/10

City Public School, Guntur.

Secondary School

March 2021

Marks: 592/600

SKILLS

- **Languages:** Java, C, Python, SQL, HTML, CSS, JavaScript
- **Framework/Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK.
- **Design & Development Skills:** UI/UX Design (Figma), Firebase & Backend Services, Android Development (Android Studio).

EXPERIENCE

AWS Data Engineering – Virtual Internship

June 2025

Gained hands-on experience in designing and implementing data pipelines using AWS cloud services. Worked with AWS S3, AWS Glue, AWS Lambda and Amazon Redshift for data ingestion, transformation and storage.

PROJECTS

Smart Community Complaint Application (AI Integrated)

- Developed a Smart Community Complaint Application to improve issue reporting and resolution within communities.
- Implemented AI-powered Smart Scan and chatbot features to assist users in submitting complaints efficiently.
- Enabled real-time complaint tracking and integrated a notification system for status updates.
- Utilized Firebase for backend services, including data storage and user authentication.
- Focused on enhancing user experience and automating the complaint handling process.

Library Management System

- Developed a Library Management System to manage book records, user information, and borrowing activities efficiently.
- Designed an organized interface with efficient data handling to simplify library operations.
- Improved resource management and usability for both administrators and users.

Job Recommendation System

- Developed a Job Recommendation System to suggest relevant job opportunities based on user profiles.
- Applied basic Natural Language Processing (NLP) techniques to analyze user data and match it with job descriptions.
- Improved job search efficiency by providing personalized job recommendations.

ACHIEVEMENTS

- Designed multiple UI/UX projects for mobile and web platforms, demonstrating strong design thinking and a user-centered approach.
- Developed an AI-integrated Smart Community Complaint Application with Smart Scan and chatbot features for real-world problem solving.
- Built and deployed multiple projects, gaining hands-on experience in frontend design and Firebase backend integration.
